**Notice of Availability of the  
Final Environmental Impact Report/ Environmental Impact Statement**

In conformity with the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA), the City of Los Angeles (City) and the California Department of Transportation (Caltrans) have approved the Final Environmental Impact Report/Environmental Impact Statement (EIR/EIS) for the 6<sup>th</sup> Street Viaduct Seismic Improvement Project. The City is the project proponent and the CEQA lead agency, and Caltrans is the NEPA lead agency on this project.

Alternative 3, Viaduct Replacement, has been selected as the Preferred Alternative. Under the replacement alternative, the proposed project would correct geometric design and structural detailing deficiencies of the existing viaduct by constructing the replacement to current standards set forth by American Association of State Highway and Transportation officials (AASHTO) and the City of Los Angeles Department of Transportation (LADOT).

In an effort to save paper, the enclosed Final EIR/EIS is being sent on compact disk (CD). A hard copy of the document may be viewed at the following locations:

- City of Los Angeles Bureau of Engineering, Bridge Improvement Program, 1149 South Broadway, Suite 750, Los Angeles, CA 90015
